

Business Continuity Services - Preparing for the worst

Business continuity and disaster recovery services are vital to business success. Crosshill Computing Services provides a range of services addressing all aspects of information security, business continuity and risk management. Our goal is to ensure that the impact of a critical system failure is minimal by implementing a robust solution so that data is adequately protected and disaster recovery procedures are in place to combat excessive downtime.

We can:

- Carry out a review of your current systems and put forward recommendations
- Design and implement business continuity plans and disaster recovery procedures
- Design and implement backup procedures including supply of all hardware and software
- Quickly supply replacement equipment either for purchase or hire in the event of a disaster
- Assure safe and timely recovery of all your valuable information.

Previous Experience and Clients

We have provided business continuity services for a range of clients. These include:

- B9 Organic Energy - Installation and configuration of NAS unit including all required software
- BPM Services - Installation of robust automated backup system with email notification
- DCI Energy - Installation of a disk based backup system with email notification
- Sensei - Data recovery/salvage on server storage subsystem.
