

Network Security - Protecting your business

Crosshill Computing Services provides a range of network security services to ensure that your business is protected. From vulnerability assessments to security implementation, we can provide a complete security services package to protect, manage and maintain your network.

We can:

- Carry out a security audit including vulnerability assessments and penetration testing
- Ensure your network design matches current industry best practices
- Sell and install network security hardware and software
- Create firewall rules and configure as required
- Analyse and report on security events.

Previous Experience and Clients

We have provided network security for a range of clients. These include:

- B9 Organic Energy - Firewall configuration, testing and secure remote access
- Clare Veterinary Group - Firewall configuration, testing and secure remote access
- MTA Components - Wireless network audit, configuration and testing.
