

Network Solutions - Getting you connected

Crosshill Computing Services specialises in all aspects of network cabling. We use the latest wireless, copper and fibre optic technologies to provide cabling solutions to meet your business requirements. From cabling and cabinet installation to equipment selection, we provide a total solution to meet your networking needs.

We can:

- Carry out a site survey and put forward networking recommendations
- Develop a network plan that will integrate new and existing technologies
- Provide full administration services for your network including design, installation, monitoring, security, training and disaster recovery
- Install comms cabinets and racks to improve ease of access, maintenance and performance
- Re-label, re-patch and insert cable management to existing comms cabinets
- Sell and install switching and routing technologies.

Previous Experience and Clients

We have provided network solutions for a range of clients. These include:

- Harvey & Co Accountants - Comms cabinet relocation - repatching and labelling
- Larne Skills Development - Installation of switching equipment and all necessary patch leads
- Whiteford Geoservices Ltd - Structured cabling installation including all cable containment
- Woodsides of Ballyclare - Comms cabinet tidy - repatching and labelling.
