

Virus and Spyware Protection - Keeping you safe

If your business connects to the internet or receives emails, you are open to the threat of a virus or spyware attack. An infection on your system can have a detrimental effect on performance and can lead to data corruption or security issues. Crosshill Computing Services offers comprehensive antivirus and anti-spyware protection for your business. We use the latest software to ensure full desktop and server security.

We can:

- Clean and remove viruses if your system is already infected
- Clean and remove spyware, adware or other scripted infections
- Make recommendations based on individual clients, for best method of protection
- Provide and install protection for single PC, workgroup or domain level workstations and servers
- Provide regular site assessments to analyse and prevent new infection types

Previous Experience and Clients

We have provided virus and spyware protection for a range of clients. These include:

- Antrim Estates Company - Installation of server based virus and spyware protection
- B9 Organic Energy - Installation of server based protection
- Clare Veterinary Group - Installation of hardware based protection
- Erne Veterinary Group - Removal of viruses and installation of new server antivirus products.
- Woodsides of Ballyclare - Installation of server based protection.
