

## VoIP Telephony - Phone systems for the future

VoIP (Voice over IP) is the next generation of voice communications. With benefits including increased productivity, performance, improved customer service and a reduction in costs, more and more businesses are switching to VoIP to carry their telephony. Crosshill Computing Services provides a total solution for your VoIP requirements. We can design, install and maintain cost effective telephony solutions that facilitate a reliable communication channel between a business and their customers.

We can:

- Review your existing system and put forward recommendations for upgrading to VoIP
- Design and install a VoIP system to meet the specific needs of your business
- Provide the necessary hardware and software, and configure the system
- Deliver training to staff
- Provide a maintenance and support service
- Reconfigure systems if your business needs change.

For an on-site demonstration of VoIP, contact Crosshill Computing Services.
